

Is It Time for You to Upgrade to UCaaS?

Astute business leaders know their phone systems are the lifeline of their business. They also know they must continually invest in upgraded technology to stay ahead of the competition. If your organization is struggling with poor connectivity, dropped calls, or outdated technology, it is likely past time for you to upgrade your business phone system.

Use the Signs as a Roadmap to Follow

To help you determine when the right time is to upgrade to UCaaS, look for these signs:

The Stats Are Eye Opening

New phone systems are allowing business communications to get faster and more intelligent. Cloud-based phone systems enable companies to optimize and streamline their communication capabilities.¹ The following stats are a great indication of what cloud communications technology can do to improve your business communications and deliver some appealing benefits:

Companies can save 50-75% on communications costs by using cloud-based phone systems.	Cloud-based phone systems are expected to dominate the market by 2025 with an estimated share of 55%.	29% of companies switch to cloud-based phone systems to simplify call forwarding to their mobile phones.	60% of companies say phone systems and live agents are their most urgent investment priorities.	Subscription-based pricing models enable an easy user and shopping experience.
